Haulotte Group
The specialist of people and material lifting equipment

INTERMAT 2009 – April 20-25, 2009

Stand E5 J 002

INTERMAT 2009, the major show for building construction, is an event not to be missed. In 2006, more than 200 000 visitors arrived in Paris Nord Villepinte. In 2009, Intermat will be the meeting point for the sector, from manufacturers of equipment to rental companies and builders giving a global vision of the industry.

HAULOTTE Group, the specialist of people and material lifting equipment, looks forward to giving its customers and partners a warm welcome on its stand to see a full range of equipment meeting the diverse needs of powered access users.

More than 120 years of experience, and a single objective: to satisfy customers by offering technically innovative equipment for improved safety, comfort, ergonomics, and productivity.

Our strategy: to produce, sell and provide service all over world. Haulotte Group achieves this by investing in production, by having a stable professional sales network, and by focussing R&D on meeting and exceeding the expectations of the market.

Trade shows, such as INTERMAT, give HAULOTTE GROUP the opportunity to present innovative equipment and to demonstrate the excellent quality of the Haulotte range.

➤ **The new telescopic big boom H28 TJ+**

The performance of the new platform **H28 TJ+** is unmatched by any other machines currently on the market. Due to its unique characteristics, this platform significantly increases the productivity in a wide range of working environments: a 6m telescopic jib,

outreach of 23m, capacity to rapidly lift up to 350kg, operator comfort (proportional movements, new generation control panel), outstanding mobility (oscillating axle, differential wheel lock). A machine that is still unequalled.

➤ **HA 41 PX : precise big boom**

Continuous optimum movement management, new platform load controller, 4° tilt alarm operating in all positions, hydraulic platform compensation, stability management in all positions for more comfort. The control panel ensures a perfect data transmission giving a total and maximum reliability

➤ **HA 120 PX : 12m tried and tested**

Designed to meet the needs of working at heights of 12 m, this articulating model is particularly suited to maintenance and repair work (heating/air conditioning, checking electrical installations, windows cleaning, painting). Up to 4 simultaneous and proportional movements, the HA120 PX boom reaches the maximum height within 30 seconds, the machine has simultaneous 4 wheel drive and steer as standard allowing easy access in difficult working areas and rough terrain conditions.

➤ **HA12 CJ : the ideal compact**

This compact electric articulating boom is designed to meet all working requirements at 12 m in congested arrears. This boom is particularly suited for maintenance and repair of electrics, lighting, air conditioning etc... Being narrow and compact this machine is ideal for working in industrial and logistic environments, and offers many benefits.

➤ **Compact 14 : electric scissor 14m**

With only 1.20 m width, 2.50 m height in stowed position, and pull-down guardrails, the Compact 14 can go anywhere. This electric scissor is particularly suited to maintenance, logistic operations, the shipbuilding industry ... and many others applications

➤ **Star 6 Picking : a dedicated mast for picking**

Haulotte Group meets the specific needs of Mass Market retailing customers, the logistics operations and industrial stores by proposing a 6 m electric vertical mast, having an adjustable picking tray. Come and discover this prototype, easy to drive, with high autonomy enabling easy picking and placing at height.

Recently Haulotte Group has acquired the American Company BIL-JAX increasing the number of products in its portfolio to more than 60 models, providing solutions to meet a wide range of customers needs.

➤ **SUMMIT SERIES : the versatility at a lower cost**

Towable booms have many advantages, more versatility, easier to transport and they offer the most reach for the least cost. They are perfect for building construction and repair; tree trimming; sign installation and repair; painting tall buildings and structures

➤ **X-BOOMS : lighter self propelled booms**

Articulating or telescopic, these booms answer to the professional requirements. Hydraulic outriggers have replaced the counterweights. Set-up is complete in less than 30 seconds, X-Booms offer versatility and ease of transport.

➤ **Scaffolds and equipments for events**

Equipment dedicated to construction; a range of fixed or mobile scaffolds and drywall equipment Bil-jax also offers equipment for events: bleachers, grandstands, stages, portable and permanent staging.

Haulotte Group also meets the needs of professionals with its ranges of materials lifting and earth-moving equipment:

➤ **HTL : telehandlers**

The **HTL telehandlers** encompass a wide range of innovations in terms of compactness, low pollution levels (with a significant reduction in noise and CO2 emissions levels), user safety, reliability, comfort, ease of use and transportation. With lifting capacities of up to 4 tons (9000 lb) and lifting heights up to 17 m (54ft 10in), HTL telehandlers can be rapidly fitted with multiple accessories.

➤ **Multijob MJX : engin de chantier multifonctions**

The natural evolution of a multipurpose civil works machine, MULTIJOB MJX is based on a unique concept so no other machine in the world offers all these features. Definitely versatile, the MULTIJOB MJX offers as standard a telescopic loader, a full rotation excavator, 4-wheel drive and 4-wheel steering, quick attachment of shovel and digger sides with translation and steering on both working positions.
